DETAILED ACTION

1. Claims 1-28 are pending in this application.

Response to Amendment

2. Applicant's amendment filed 12/26/2006 in response to the previous Office Action (9/1/2006) is acknowledged. Rejections of claims 1-14 and 25-28 under 35 U.S.C. § 112, second paragraph (5a and 5c) have been obviated. The second paragraph rejection (items 5b and 5d) has been maintained. Applicant's amendment to overcome the second paragraph issues introduces new issue that needs further rejection of the claims.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action. Applicants have to delete the phrase "wherein two adjacent positions on Ring A may optionally be joined to create a fused aryl group" from claims 1 and 25.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1624

Claims 1-14 and 25-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. In claims 1 and 25, the phrase "substituents for nitrogen atoms on Ring A are selected from the groups consisting of aryl,..." is not clear. Ring A has only one nitrogen i.e. $V_4 = N$ and cannot be substituted by other substituents, because the ring nitrogen in Ring A has already three bonds. Do applicants intend quaternary nitrogen? If so, what is the counter ion?

Note that the definition of V_2 and V_4 taken together may be replaced with "...NR₇" is deleted from the claim, because it is a non-elected invention.

b. In claim 13, the phrase "Compounds (I-1)- (I-7)" is not clear. What are compounds of formulae (I-1)-(I-3)? There are compounds of formulae (I-4)- (I-7), but not compounds of formulae (I-1)- (I-3).

Response to arguments

Applicant's argument filed 12/26/2006 has been fully considered but it is not persuasive.

Applicant's amendment overcomes the second paragraph problem partially, but not completely. Applicant's amendment introduces a second paragraph issue, because of the recitation of compounds of formulae (I-1)-(I-3).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
